PROJECTS

My Hostel — *Students Database Management System*

It is a C language-based application that allows hostel owners to create, view, edit and delete records of their students. It aims to replace the traditional practice of keeping records in hand-written documents.

Fitness Club — *Website for Gym*

It is a Django framework-based website where users can register by entering their details. On the admin side, the gym owner can view, edit and delete the information of the registered customers. Also, the deleted information can be recovered from the trash bin.
